PROFILE

I am a motivated and curious person with a strong passion for technology, continuous learning, and personal growth. I enjoy exploring new ideas, understanding how things work, and challenging myself to improve both personally and professionally.

WORK EXPERIENCE

Sep 2023 – Present

Software Engineer, ANO Software · Porto

FutureERP-R3

- Develop and maintain an enterprise ERP platform built with Python and PostgreSQL.
- Implement new functionalities, bug fixes, and application maintenance.
- Investigate and troubleshoot production issues reported through client tickets.
- Work extensively with PostgreSQL, including complex queries, database structures, functions, and triggers.
- Support different client environments, including integrations with SIBS, LDAP, and other third-party services.

FutureERP-R4

- Contribute to a new ERP platform built from scratch using Java 21, Spring Boot, React, TypeScript, and PostgreSQL, replacing functionality from the legacy system.
- Develop backend functionality using Controller → Service → Repository architecture, including REST APIs, validation, pagination, filtering, and sorting.
- Develop frontend features and application structure using React, Vite, and TypeScript, adapting the existing ERP design to provide a consistent user experience.
- Design and implement the application's authentication system using Keycloak and OAuth2, enabling Single Sign-On (SSO) between FutureERP-R3 and FutureERP-R4.
- Developed the initial React frontend structure and implemented the first major business module from scratch business workflows.
- Create and modify PostgreSQL database structures using Liquibase, including tables, indexes, constraints, views, functions, and triggers.
- Build Docker images and Docker Compose configurations and prepare deployments to Linux-based client environments.
- Participate in code reviews, unit testing, issue planning, and milestone organization within a small development team.

EDUCATION

Sep 2020 – Jun 2023

Computer Engineering, Universidade de Trás-os-Montes e Alto Douro

Software Development: C, C++, C#, ASP.NET MVC, HTML, and CSS.

SKILLS

Programming Languages	Java • Python • TypeScript • C# • SQL
Frameworks	Spring Boot • React • Vite • HTML • CSS • Maven
Databases	PostgreSQL • Oracle • SQL Server
Tools	Docker • Git • GitLab • Liquibase • Linux

LANGUAGES

Portuguese	Native speaker	English	Professional working proficiency
